"Your Bi-Weekly Construction Update"

Construction Update:

Volume 1, Issue 14, 1/22/10

Yesterday, the final portions of the tent came down to reveal the exterior façade. All of the exterior CMU block is now sealed and exterior glazing installed. The sunshades are going up around the perimeter of the building and the landscapers are on-site installing the irrigation system. In the interior, the majority of the walls have been framed and insulated, taping of the dry-wall has begun.
